

[illegible][illegible]

Here is an example of a numbered list:

1. List entry number 1 List entry number 1 List entry number 1 List entry number 1
List entry number 1 List entry number 1,
2. List entry number 2, List entry number 2, List entry number 2, List entry number 2,
List entry number 2, List entry number 2,
3. List entry number 3,
4. List entry number 4, and
5. List entry number 5.

- This is an example of bulleted listing.
- This is an example of bulleted listing. This is an example of bulleted listing.
- This is an example of bulleted listing. This is an example of bulleted listing. This is an example of bulleted listing.
- This is an example of bulleted listing. This is an example of bulleted listing. This is an example of bulleted listing. This is an example of bulleted listing.
- This is an example of bulleted listing.

[illegible]

† This is an example of first footnote.

- This is an example of bulleted listing.
- This is an example of bulleted listing. This is an example of bulleted listing.
- This is an example of bulleted listing. This is an example of bulleted listing. This is an example of bulleted listing. It contains another list nested inside it. The inner list is an *enumerated* list.
 1. This is the first item of an enumerated list that is nested within the itemized list.
 2. This is the second item of the inner list. LATEX allows you to nest lists deeper than you really should.

This is the rest of the second item of the outer list. It is no more interesting than any other part of the item.

- This is the third item of the list.

The default formatting of numbering can be changed as (1), (2), (3). . . , for example,

- (1) List entry one.
- (2) List entry two.
- (3) List entry three.
- (4) List entry four.
- (5) List entry five.

The default formatting of numbering can be changed as (i), (ii), (iii). . . , for example,

- (i) List entry one.
- (ii) List entry two.
- (iii) List entry three.
- (iv) List entry four.
- (v) List entry five.

The default formatting of numbering can be changed as (a), (b), (c). . . , for example,

- (a) List entry.
- (b) List entry two.
- (c) List entry three.
- (d) List entry four.
- (e) List entry five.

The default formatting of numbering can be changed as I, II, III. . . , for example,

- I. List entry.
- II. List entry two.
- III. List entry three.
- IV. List entry four.
- V. List entry five.

1.3. *Here is an example of extract*

This is an example text of quote or extract. This is an example text of quote or extract. This is an example text of quote or extract. This is an example text of quote or extract. This is an example text of quote or extract. This is an example text of quote or extract. This is an example text of quote or extract.

1.4. Equations

Example of a single-line equation 1.1.

$$a = b \text{ ((Single Equation Numbered))} \dots \quad (1.1)$$

Equations can also be multiple lines as shown in Equations 1.2 and 1.3.

$$c = 0 \text{ ((Multiple Lines, Numbered))} \dots \quad (1.2)$$

$$ac = 0 \text{ ((Multiple Lines, Numbered))} \dots \quad (1.3)$$

Unnumbered display equations single line:

$$\Gamma\psi' = x'' + y^2 + z_i^n$$

Unnumbered display equations multiple lines:

$c = 0$ ((Multiple Lines, Unnumbered))...

$ac = 0$ ((Multiple Lines, Unnumbered))...
